DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 13-41 and 44-56, drawn to a Chirped pulse amplification system, classified in class 359, subclass 333.
- II. Claims 12-14, 42 and 43, drawn to the design or adaptive modification of the dispersion profile of a Bragg grating, classified in class 359, subclass 337.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as being used to design a grating that adaptively compensates for dispersion induced by the amplification of WDM signals. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication should be directed to Mark Hellner at telephone number 703 306 4155.
